

# DO YOU KNOW WHAT YOU SHOULD DO IN CASE OF A WILDFIRE?

**1** Do not try to extinguish a large fire yourself.

**2** Escape from the fire as quickly and as far away as you possibly can. Preferably move towards a public road or built-up area.

**3** Do not walk away in front of a fire or in the direction in which the fire spreads. Walk away perpendicular to the fire, so you will distance yourself from the seat of fire.

**4** Call 112 and tell as precisely as possible where the fire is located. The 112 dispatcher uses SMS verification to determine your location, so keep your phone within reach.

**5** Help other people and children to reach a safe area.

In other cases, orient yourself using the available designations of cycle route nodes or ANWB signs.
